Program Plugins Linters

Program	Visual Studio Code 1.51.1
Code Formatter	Prettier 5.8.0
HTML	W3C Validation 2.8.0
CSS	stylelint 0.86.0
Javascript	ESlint 2.1.13

There were a number of minor code formatting issues that did not seem to alter page function; spaces added, line breaks added, redundant charset, and script type removed. All were resolved by following the descriptions for each error.

No unfixed errors were listed.

Colour Contrast

I adjusted the orange colour from #F26724 to #e4560f for an increased accessibility value of 3.73/4.5 (up from 3.12) This was a notable improvement, and while slightly below AA on the buttons, I feel any further adjustment would betray the brand and the overall aesthetic.
